#### HEALTH DEPARTMENT

#### PUBLIC HEALTH OFFICERS

Medical Officer of Health:

N.E.GORDON, M.B., Ch.B., D.P.H. Also Divisional Medical Officer, Division 18, West Riding County Council, Health Department, Lawson Road, Brighouse. Telephone Brighouse 2515.

Deputy Medical Officer of Health and Deputy Divisional Medical Officer:

Miss M.P.MILLIGAN, M.B., B.Ch., B.A.O. (Dublin), D.P.H. (Hons.) B.Sc.

Assistant County Medical Officer for Division 18, West Riding County Council:

Dr. J.P.BRADNOCK, M.B., Ch.B. (Commenced June, 1969.)
Dr. M.G.P.MOXON, L.R.C.P., S.I., L.M. (Terminated June, 1969.)

Orthopaedic Surgeon:

\*\*K.S.DAVIES, M.B., Ch.B., F.R.C.S., L.R.C.P., F.R.C.S. (Edin.).

Ophthalmic Surgeons:

\*\*S.ROBERTSON, M.B., Ch.B., D.O.M.S. \*\*S.B.DAVIES, L.R.C.P., L.R.C.S., D.O.

Dental Staff:

G.A.THOMPSON, D.Orth., B.Ch.D., L.D.S., County Orthodontist. M.R.HOLLINGS, F.D.S., B.Ch.D., Specialist in Advance Conservative Dentistry.

W.A.ALLEN, B.D.S., L.D.S., Senior Clinical Dental Officer.

H.G. THORP, L.D.S., Area Dental Officer.

E.THORNTON, L.D.S., Dental Officer.

Mrs. J.A.NUNN, Dental Auxiliary.

Chief Public Health Inspector, Public Cleansing and Salvage Officer:

W. JENNINGS, M. A. P. H. I., M. Inst. P. C.

Meat and Food Inspector's Cert.Royal Society of Health. Testamur Institute of Public Cleansing.

Smoke Inspector's Certificate, Royal Society of Health.

Diploma, Royal Institute of Public Health and Hygiene.

Deputy Chief Public Health Inspector:

G.E.BOTTOMLEY, M.A.P.H.I., A.M.Inst.P.C.

Meat and Food Inspector's Cert.Royal Society of Health.

Testamur Institute of Public Cleansing.

Smoke Inspector's Certificate, Royal Society of Health.

Section II (Food Inspections) of the Sanitary Inspectors

Association's Diploma in Sanitary Science and

Administration.

Additional Public Health Inspectors:

A.R. PRYKE, M. A. P. H. I.

Diploma in Most and other Foods, Royal Sanitary Association of Scotland.
Smoke Inspector's Certificate, Royal Society of Health.

S.L.RATHMELL, M.A.P.H.I., M.R.S.H. Meat and Food Inspector's Diploma, Royal Society of Health.

Technical Assistant, Smoke Control Areas:

E. HEPTINSTALL.

Technical Assistant, General Duties: W.O. BURTON.

Divisional Nursing Officer:

Miss C.J.BARKER, S.R.N., S.C.M. Health Visitor's Certificate. Queen s Nurse.

Health Visitors:

Mrs. D.M. DACK, S.R.N. 1st Part Midwifery. Health Visitor's Certificate.

Mrs. N. FOSSARD, S.R.N., S.C.M., R.F.N.

Mrs. O. HEWITSON, S.R.N., S.C.M.

Health Visitor's Certificate (Commenced September, 1969).

Mrs. E. HUGHES, S.R.N.

Health Visitor's Certificate (Terminated November, 1969).

Miss D.H. ORMESHER, S.R.N., S.C.M.

Health Visitor's Certificate.

Miss E.E.TIDSWELL, S.R.N., S.C.M.

Health Visitor's Certificate.

Mrs. S.M. TODD, S.R.N., S.C.M.

Health Visitor's Certificate (Commenced April, 1969; Terminated August, 1969).

Assistant Health Visitors:

\*Mrs. M. ARITAGE, S.R.N.

₩Mrs. E. CRAWSHAW, S.R.N., S.C.M.

\*Mrs. A. GARSIDE, S.R.N. (Terminated August, 1969).
\*Mrs. J. PICKARD, S.R.N., S.C.M.

Midwives:

Miss S. BOLTON, S.R.N., S.C.M. (Commenced July, 1969).

Miss B. KELLY, S.R.N., S.C.M. (Commenced December, 1969).

Miss W. LISTER, S.R.N., S.C.M.

Mrs. K.S.MARK, S.R.N., S.C.M. Queen's Nurse (Terminated April, 1969).

Miss B.E.V.REID, S.R.N., S.C.M. (Terminated August, 1969).

Home Nurses:

Mrs. E. BRIGGS, S.R.N., S.C.M. (District Training Certificate).

Mrs. P. EASTWOOD, S.R.N.

Queen's Nurse.

Mrs. S. FRANCE, S.R.N.

Mrs. A.M. RUSHWORTH, S.R.N.

Queen's Nurse (Area Relief).

Mrs. M.B. WALFER, S.R.N.

Queen's Nurse.

Mental Welfare Officers:

S. PARKINSON (Senior).

A.B.BURTON, S.R.N., R.M.N.

E.K.DARLINGTON.

Staff at Wellholme Park Day Nursery:

Miss J. WALSHAW, N.S.C.N., Matron.

Mrs. B. BERRY, S.R.N., Deputy Matron.

These personnel were assisted by a staff of Certified Nursery Nurses and Nursery Assistants.

Senior Clerk:

G.O.RICHARDSON.

#### Clerks:

\*Miss J.R.BLEZARD.

Mrs. D.CHEETHAM. \*Mrs. M.ECKERSALL.

Mrs. E.FIL3Y.

Mrs. G. HALMOND.

Miss J.M. HALMOND.

\*Mrs.E.HIRST.

Mrs. C. HOLDSWORTH (Commenced January, 1969).

Miss I.HOLMES.

Mrs. J.S.LONGWARD. (Terminated February, 1969).

#### Cleansing and Sanitary Section:

M. AKROYD.

Mrs. B.L. HANSORD.

Miss C.A.MOFFAT.

Mrs. M. OATES.

## Clerk/Pupil Public Health Inspectors:

G.HARTLEY (Qualified and terminated September, 1969). P.J.ROULSTONE (3rd year Student).

Divisional Depot Superintendent, County Ambulance Services W. ANDERSON.

<sup>\*</sup> Part-time.

<sup>\*\*</sup> Part-time by arrangement with the Regional Hospital Board.

TO THE MAYOR, ALDERITEN AND COUNCILLORS OF THE BOROUGH OF BRICHOUSE

Madam Mayor, Ladies and Gentlemen,

I have the honour to present the Annual Report on the health of the Borough for 1969, the year previous to my appointment as Medical Officer of Health. With your agreement the report is in the present interim form as part of a new procedure being adopted in the printing arrangements.

Under the Divisional Health Scheme your Medical Officer is also the Divisional Medical Officer for the West Riding County Council's Local Health Services. The present Divisional Unit was formed from the former Brighouse and Todmerden Divisions, your Medical Officer having similar functions and responsibilities in the other seven districts in the combined area.

The vital statistics for the Borough continue to convey the picture of an expanding, thriving community with a substatial representation of the younger age groups. The Registrar General's estimated figure for the mid year population was 33,130, an increase of 220 over the previous year, and the proportion of working population unemployed at 1.3 per cent. remained low. The birth rate, which had been running at a comparatively high level for some years, again showed a slight decrease but continues to be higher than the figure for the Administrative County and the County as a whole. The death rate of infants under one year showed a welcome drop from the high figure recorded in 1968 and at 18.8 per thousand live births is slightly lower than the County figure although still above the natural level. Unfortunately the same happy trend was not exhibited in the number of illegitimate births which increased by 12 over the previous year. When it is considered that one baby in eleven born alive was illegitimate a challenge is presented which must be met.

The number of Still Births totalled eleven, again an increase, but in the majority of cases the outcome was determined by associated malformation of the baby, or placental insufficiency.

The death rate in 1969 was rather higher than in the previous year, the leading causes being, predictably, heart and circulatory disease, vascular disease of the nervous system, followed by deaths from cancer. Lung cancer continued to take its inexorable toll with an increase from 11 deaths in 1968 to 17 in 1969. Deaths from respiratory disease occupied fourth place but showed a slight drop compared with 1968.

A dramatic reduction occurred in the number of measles cases, 13 only being notified during the year. This encouraging picture will depend entirely on an active and continuing pursuit of the measles vaccination policy, as part of routine immunisation, to protect the susceptible child population. Scarlet Fever became the most prevalent infectious disease in 1969, 26 cases being notified. There

were 9 cases of infective jaundice; this disease was made notifiable in 1968.

The Mass Radiography Unit paid the customary biomnial visit to the area, sessions being held at Brighouse Health Centre, T.F.Firth & Sons, Ltd., Kossett Carpets Ltd., Brockfoot Dyeworks and J. Blakeborough & Sons, Ltd. Nearly 3,000 examinations were conducted; 3 cases of tuberculosis were detected and one cancer case. Statistical conclusions from these results may not be applied to the community as a whole since those examined came from selected groups, and in order to employ the reserves of the Unit effectively, screening will be concentrated on specially selected groups, including immigrant populations, in the future. The number of new cases of respiratory tuberculosis notified during the year was 7 (the same as 1968) with 2 new cases of non-respiratory tuberculosis.

Turning to immunisation procedures, the revised immunisation schedules under the West Riding Computer Scheme introduced in April, 1968, mean that primary immunisation courses are now completed at the age of 14 months instead of 6 months as previously. In this initial period of transition there was thus an apparent fall in the number of courses completed during the year. However, it is confidently expected that the benefit of the new procedure will be demonstrated in subsequent years by significant raising of the percentage of children completing the full primary course.

Attendance at Infant Welfare Climics continued to be satisfactory. The number of attenders at the Chiropody Clinics showed an increase; similarly the total recipients of speech therapy and child guidance services reflects the improved staff position over 1968. The Ante-Natal Clinic attendances demonstrated the slight but steady downward trend noted in previous years. This does not represent decreased care but rather redistribution of antenatal examination towards the family doctor and hospital out-patient departments. In the same vein the number of domiciliary confinements was loss, 16 per cent of the births taking place at home compared with 19 per cent in 1968.

The rapid growth in the domand for care and play facilities for pre-school children in recent years makes it increasingly important to be assured that the standards of care are of a satisfactory order. New regulations covering the inspection and registration of Child Minders and Day Nurseries were introduced at the end of the previous year and are designed to impose levels of supervision and care as well as providing a stimulating environment for the children. The County Council's Day Nursery in Brighouse has, for some time, provided useful facilities in this direction but admission of children is conditional upon certain priority considerations applying.

Towards the other end of the age span, supervision of the olderly in their homes by means of the Warden Schemes provides

an essential and most acceptable platform from which, it is to be hoped, community services may combine effectively in providing support for our senior citizens. There were four "interim" schemes in Brighouse at the end of 1969 plus six schemes where elderly people in their homes received daily visits from a Warden. It is appropriate to pay tribute at this point to the invaluable role of the several activities carried on by the voluntary workers in promoting care and social contact for the elderly.

In the field of Mental Health, during 1969 the Brighouse Training Centre provided places for 8 females and 4 males over the age of 16 in addition to 23 junior trainees. Happily this marked the last year of difficulties for both staff and trainees in this building pending completion of the new Centre at Rastrick. Unfortunately, the Psychiatric Social Club, which started in Brighouse Clinic at the beginning of 1968, had to be discontinued during 1969 due to lack of numbers attending.

The Public Health Department continued to advise, inspect and sample in order to ensure that Regulations were observed in respect of food hygiene and the sale of pure milk. Although pressed by shortage of staff, alleged complaints of unsound food received immediate attention. Brucella Abortus organisms were detected 10 times in raw milk supplies as a result of routine sampling and 3 times in Brighouse produced milk by other Sampling Officers. It is pleasing to note the continuing co-operation of the farmers in singling out the affected cows. The incidence of Brucellosis in human beings has not been clearly established; it is, however, a condition which can cause a considerable degree of ill health and government proposals to introduce an eradication scheme in the near future will, it is hoped, represent an appreciable step forward. progress has been made in the avoidance of contamination of milk supplies by the introduction of the TTC test to ensure that traces of antibiotics are not present.

Progress in the clearance of unfit houses continued and a detailed account of representations and Orders made has been reported by the Chief Public Health Inspector. At the end of the year over 1700 houses remained to be dealt with but it is possible that a considerable number of these could be improved with grant aid. Unfortunately the number of houses improved by means of grants was again disappointingly low - 59 as against 77 in 1968. It is to be hoped that, under the provisions of the 1969 Housing Act basic modern amenities will be supplied to an increasing number of those houses which, although old, are structurally sound and suitable for improvement.

In the pursuance of "Clean Air" progress in the Borough was maintained at a pleasing level and by the end of the year more than four-fifths of the houses in the Borough were within Clean Air Zones. In the face of somewhat alarming claims that smokeless fuels will not be in sufficient supply to meet demand it is to the credit of the residents that their attitude should continue to be one of co-operation and enlightenment.

Finally, may I express, on behalf of the department,

gratitude for the understanding and courtesy of the Members of the Council and to thank Mr. Jennings, the Chief Public Health Inspector, for his kind assistance and co-operation at all times.

I have the honour to be, Madam Mayor, Ladies and Gentlemen,

Your obedient Servant,

SAMUEL H. BROCK

Medical Officer of Health.

November, 1970.

#### ANNUAL REPORT OF

THE

MEDICAL OFFICER OF HEALTH FOR THE YEAR 1969.

# STATISTICS AND SOCIAL CONDITIONS IN THE AREA.

TOTALS	226	211	437

# VITAL STATISTICS.

The estimate of the population of Brighouse is the midyear estimate of the Registrar General. His estimate is 33,130, as compared with 32,910 in 1968. He considers, therefore, that our population has increased by 220. There were 584 live births, and 437 deaths, so that there was a natural increase in population of 147.

#### Birth Rate.

The birth rate for the year is 17.6 per 1,000 of the population, which compares with the birth rate of 18.2 for 1968. To compare the birth rate with any degree of accuracy with that of the country as a whole, it is necessary to adjust the crude birth rate by multiplying it by the area Every district varies as to the comparability factor. distribution of population among the sexes and in age ranges. The area comparability factor is an attempt to standardize our sex and age range with that of the country as a whole. Our area comparability factor is 1.09, which means that with our present sex and age range, the crude birth rate has to be adjusted upwards to bring it into line with the country as a whole, and our corrected birth rate is 19.2. This is 2.9 above the rate for Englandand Wales and 2.1 above the rate for the West Riding Administrative County.

There were 55 illegitimate live births, representing 9.4% of the total live births, and an illegitimate birth rate of 1.7 per 1,000 of the estimated population.

During the year there were eleven stillbirths. This gives a stillbirth rate of 18.5 per 1,000 (live and still) births, as compared with 13.5 for the West Riding of Yorkshire, 13.2 for England and Wales, and 13.2 for this town last year.

#### Death Rate.

The death rate for the Borough is 13.2 per 1,000 of the population. The comparability Factor for obtaining the adjusted death rate is 0.98 this year, and using this factor we have an adjusted death rate of 12.9. Our death rate compares with the rate of 11.9 for England and Wales, and 12.6 for the Administrative County.

The chief causes of death this year were - in order of frequency:-

- 1. Diseases of the Heart and Circulation 160 (compared with 170 in 1968).
- 2. Vascular Lesions of the Nervous System 84 (compared with 51 in 1968).
- 3. Cancer 78 (compared with 69 in 1968).
- 4. Pneumonia, Bronchitis, Influenza and other respiratory diseases 46 (compared with 49 in 1968).

#### Infant Deaths.

Eleven children (eight males and three females) under one year of age died during the year. There was one death among illegitimate children.

The death rate of infants under one year of age per 1,000 live births is 18.8. This rate is just below that for the West Riding Administrative County, which is 18.9, and above that of the country as a whole, which is 18.1.

Particulars of the deaths of children under one year of ago are appended below, and last year's figures are given in brackets:-

8 (9) under one week.

1 (-) between one week and one month.

2 (5) between one month and one year.

Nine of the eleven deaths occurred within the first month of life, and our neo-natal death rate is 15.4 compared with 12.3 for the Administrative County and 12.0 for the country as a whole.

# GENERAL PROVISION OF THE HEALTH SERVICES IN THE AREA.

### Laboratory Facilities.

The Public Health Laboratory, Wakefield, continues to receive clinical material and milk and water samples for bacteriological examination, while chemical analysis is carried out by Messrs. Lea and Mallinder.

Facilities are also provided by the Regional Blood Transfusion Sorvice at Leeds, and General Practitioners have open access to the services of the Pathological Laboratory at the Royal Halifax Infirmary.

#### Ambulance Service.

The County Ambulance Station at Brighouse provides cover for the Brighouse Borough and neighbouring areas of the County. This service is administered from the Group Control at Birkenshaw, telephone number Bradford 682211, and all requests for the ambulance service should be made to the Centro.

Appended heroto are particulars of the cases transported during the year. The figures are given monthly, and the total for last year is appended in brackets after the total in each line. This table applies to the whole Division. It has not been possible to split the Divisional figures to give the figures for Brighouse alone.

# Home Nurses.

Five full-time Home Nurses are employed in Brighouse Borough, three of them being qualified Queen's Nurses and a fourth having been successful in passing the examination after undertaking a special course recently inaugurated by the Ministry of Health and the West Riding County Council which now replaces the examination of the Queen's Institute of District Nursing.

Altogether, 633 cases were visited and 13,497 visits were made by the Home Nurses.

#### Home Helps.

At the beginning of the year, 242 domestic cases were being attended, 212 of these being old people. During 1969, there were 70 new domestic cases, of which 59 were old people. This compares with the figures of 88 domestic cases, of which 73 were old people, for the previous year. Eighteen new maternity cases were attended as compared with 23 last year. One case had the service continued after the puerperium.

At the end of the year, 249 domestic cases and two maternity cases were being attended. Two hundred andnineteen of these were old people. At the end of 1969, 42 Home Helps were working part-time in Brighouse and the total number of hours worked during 1969 was 28,896. This figure compares with 30,473 for 1968.

#### Chiropody.

The County Council's Chiropody Service makes provision for treatment of persons of pensionable age, for the physically handicapped, and for expectant mothers upon the recommendation of their Family Doctor or a Nurse. The Scheme continues to be very much appreciated, and, altogether, 1,522 Brighouse patients, almost all old people, received 8,401 treatments. The Scheme is administered directly by the County Council, and sessions were held in the Brighouse, Rastrick, Hipperholme and Southowram Clinics. Arrangements were made for domiciliary treatment for old people who were unable to attend the clinics.

# Old People's Welfare Committee.

This committee meets at bi-monthly intervals. It is a large, widely representative committee and the attendance of members indicates a sincere interest in the work.

#### Meals on Wheels.

This service, which is now well into its eighth year of operation, continues to function smoothly and efficiently under the aegis of the Women's Voluntary Services.

The meals are distributed on three days a week, and 60 elderly people received this nourishing meal at the subsidised cost of ls.0d.

#### Luncheon Club.

This club was opened four years ago and is being run most successfully by a Sub-Committee of the Old People's Welfare Committee and co-opted voluntary helpers. It has proved a great boon to those elderly people who are encuraged, when able, to go out. At present, it is possible to serve this truly excellent meal only on one day a week to 24 people.

However, the Centre is open every day of the week, except Sunday, and has become a very popular rendezvous, Here the old people can have a rest, a chat, and a cheap cup of tea. Tea and biscuits are served morning and afternoon.

#### Health Education.

Health Education forms an integral part of the work of the Health Visitor both when visiting the mother in her ewn home, and when conducting a clinic. Posters, leaflets, films and other visual aids are available, and several subjects were dealt with during the year.

#### Cervical Cytology.

This examination for the early detection of Cancer of the Cervix is now available in the Brighouse Clinic and may also be carried out by Family Doctors. Twenty-three sessions were held at Brighouse, at which 365 patients attended. Two positive smears were reported and the patients were referred for further investigation.

#### Health Visitors.

The duties of the Health Visitor are combined with those of School Nurse. In pursuance of the National Health Service Act, the scope of this service includes home visiting for the purpose of giving advice as to the care of children and persons (including adults) suffering from illness and/cr expectant and nursing mothers. The Health Visitors also give advice in the home as to measures necessary to prevent the spread of infection.

In Brighouse, the Health Visitors are attached to General Practitioners and serve the families on their medical lists, rather than working in fixed districts. This attachment has led to a closer integration of the two services and is very much appreciated.

#### Ante-Natal Clinics.

The attendances at anto-natal clinics are set out in Table 5. The figures show a decline in attendances in recent years but give a very incomplete record of the total amount of anto-natal care received by mothers as in most cases the patients are also seen by their own Doctors, or attend the Hospital Out-Patient Clinic.

TABLE 5.
ATTENDANCES AT ANTE-NATAL CLINICS.

	1965.	1966.	1967.	1968.	1969.
Number of sessions	100	101	97	99	99

Average number of patients per session	11.9	11.1	10.0	9.1	8.5

## Rolamation Clinics.

 $\Lambda$  table showing particulars of the work of the clinic is given below.

# TABLE 6.

# ATTENDANCES AT RELAXATION CLINICS.

Total	Individual Mothers	 • • •	•	 0 . 0	153
	Attendances	• • •		000	751

# Domiciliary Midwifery.

The West Riding County Council employs three full-time Midwives in the Borough. In 1969, there was a decrease in the number of domiciliary confinements, only 16% of babies being born at home. The Midwives are trained in the administration of trilene and gas and air analgesia, and provided with all the necessary equipment. Analgesia is available to all mothers desiring it, subject to satisfactory medical examination. The Midwives have also received special training in the care of premature infants, and a new type of incubator is now in service. This can be ready for immediate use at the Brighouse Ambulance Station and it is available for moving premature babies to special care units in hospital.

The work done by the Midwives is set out in Table 7 below :-

# TABLE 7.

# WORK DONE BY MIDWIVES DURING 1969.

Labours	conducteds	(a) (b)	as	Midwives Maternity	Nursos	 95 <b>-</b>

Maternity outfits are provided free to mothers preparing for confinement in their own homes.

#### Dontal Schemo.

During the year, 55 expectant mothers were referred to W.R.C.C. clinics, and treatment was carried out in 42 cases.

# Infant Wolfare Centres.

The work of the respective Centres is set out in Table 8 which follows:-

	Brig- house	Ras- trick	Hipper- holme.	South- owram.	Totals.
Number of sessions Individual children attending Hedical consultations	102 426 922	51 337 689	50 324 643	50 175 384	253 1,262 2,638
Attendances of children born in 1969 Attendances of other children Total attendances	1741 1505 3246	1211 1095 2306	_	421 714 1135	4,088 4,452 8,540
Average attendances per session	31.8	45.2	37.1	22,7	33.8

#### Voluntary Helpors.

Once again, considerable thanks are due to all the ladies who gave generously of their time to serve as voluntary helpers at the various clinics. They continue to provide a most welcome service.

#### Wolfare Foods.

National Dried Milk, Cod Liver Cil, Crange Juice, etc., are distributed at the Centres and a variety of brands of dried milk and other infant foods are sold at the Child Welfare Centres for the convenience of mothers.

#### Orthopaedic Treatment.

During theyear, 82 children under school age were examined by the Orthopaedic Surgeon, and particulars of these cases are given below:-

Genu Varum	• • •	• • •	• • •		20
Genu Valgum	• • •		•••		15

Number of children referred for treatment	246

## Minor Ailments Clinic.

409 children attended at the minor ailments clinic during the year.

#### Ophthalmic Clinics.

679 children were seen at these clinics during the year, and glasses were prescribed in 391 cases.

#### Dental Clinic.

The following table gives a record of work done in the Division during the year:-

DENTAL INS Number of Number of Number of	children children	inspect offered	ed l trea	tment	• • •	000	8,245 4,354 3,243

In Open A				7

#### Remedial Exercises.

45 children attended for remedial exercises, making 197 attendances.

#### Speech Therapy.

57 children were seen at this clinic during the year.

#### Child Guidance.

177 children were seen at the Child Guidance Clinic which commenced here in October 1968.

# WELLHOLFE PARK DAY NURSERY.

The West Riding County Council maintains a 40-place Day Nursery at Wellholme Park, Brighouse. This is staffed by a Matron, Deputy Matron, a Warden, a Nursery Nurse and two Assistants. Admissions to the Nursery are restricted to young children within the approved priority categories, including the young child whose mother is ill or having a baby, the illegitimate child whose mother is required to work, the young child of the widow who must educate and support her family unassisted, and the young child of the mother whose husband is ill.

In 1969, the number on the roll varied between twenty-five and thirty-two, and the average number of daily attendances was twenty-three.

#### MENTAL HEALTH.

The Mental Health Service is administered on a Divisional basis and two Mental Welfare Officers are based on Brighouse to serve this area. In addition, we share the services of Mr. Perkinson, the Senior Mental Welfare Officer, who has responsibilities throughout the much larger catchment area of Storthes Hall Hospital. The holiday and off-duty relief arrangements with the Officers based on Todmorden have worked very well. Quarterly rotas have been prepared and distributed to all General Practitioners and Hospitals, and also to the Police and Ambulance staffs.

## In-Service Training.

All newly-appointed Welfare Officers attend an induction course at Leeds and subsequently arrangements are made for them to attend County courses at Grantley Hall once a year; in addition, fortnightly seminars are held at Brighouse. Suitably qualified Officers are encouraged to apply for vacancies on the two-year Younghusband Course for Social Workers.

# Residential Hostels.

There is an increasing demand for places in residential hostels for both mentally ill and mentally subnormal patients. The County Council now has two hostels at West Ardsley and we have occasionally been able to find places in hostels situated in neighbouring County Boroughs. With the increasing turnover of patients in mental hospitals, and the emphasis on community care, it seems likely that very many more hostels will have to be provided in the future.

#### Divisional Training Centre.

Brighouse Junior Training Centre provided places for eight females and four males over the age of sixteen years, in addition to twenty-three juniors. Both staff and patients are working under acute difficulties in the very limited accommodation in this building. A new comprehensive centre is now under construction at Rastrick and this will accommodate 108 patients of all ages and will include a special care unit. In the meantime, 12 adult patients from this area are travelling daily to the West Riding Centre at Kirkburton and a few patients are also attending Centres run by other Local Authorities.

#### Montal Subnormality.

Regular visits were made by the Mental Welfare Officers to all subnormals in the area who are under their care.

No. of subnormal patients receiving care and guidance ... 116

No. awaiting admission to hospital ... 
No. of admissions to hospital for short-stay care ... 16

#### SANITARY CIRCUMSTANCES IN THE AREA.

Of the 12,805 houses in the Borough, 12,788 are on the public supply, which has remained satisfactory as regards quantity and quality throughout the year. With the exception of six houses supplied by standpipe, all those on public supply received water direct to the houses. The remaining houses have private supplies derived from springs and wolls, the majority of which are frequently contaminated by animal pollution. In the section of the report contributed by the Chief Public Health Inspector, it will be seen that 19 out of the 49 samples taken from private water supplies were unsatisfactory, and the only safe way for people with private water supplies from shallow wells is for the water to be boiled. It is unlikely that any great improvement in this position will be made in the near future as most of the houses and farms not on public supply are remote from any public water main or service. Some of these houses, however, have been included in our slum clearance programme as unfit and this should reduce their number. Examinations for plumbo-solvency were satisfactory.

I am informed by the Waterworks Manager of the Calder-dale Water Board that 2,561 yards of main were installed in extension of mains, and 1,808 in replacement of mains during the year.

#### Drainage and Sewerage.

No re-drainage works were carried out during 1969.

#### Rivers and Streams.

The Yorkshire Cuse River Authority is the supervising Authority.

#### Atmospheric Pollution.

Seventy-three smoke observations were made during the year, and full particulars of the 13 recorded observations are given in the Chief Public Health Inspector's report.

We received notification of thirteen new furnaces. Sixty visits were made to boiler plants.

#### Public Baths.

I am obliged to the Baths Manager for the following information:-

#### Attendances.

	1968.	1969.
Mixed Bathing Segregated Bathing	43,116 6,141	41,127 4,987
Swimming Club Schoolchildren and organised	6,609	7,131
classes	44,660	34,401
Slipper Baths	2,968 103,494	<u>2,509</u> 90,155

# HOUSING PROGRAMME.

The Borough Engineer informs me that the following houses were completed by the Council in 1969:-

Towngate, Hipperholme:

Cne-bedroomed flats	<u>6</u>	6
Kiln Fold Estate, Clifton: Old Pooplo's Bungalows One-bedroomed flats	10 <u>20</u>	30
Sunnybank Road: Cne-bedroomed flats	<u>30</u>	30
Field Lane, Stage 3:  One-bedroomed bungalows Three-bedroomed houses One-bedroomed flats	26 20 <u>24</u>	<u>70</u> 136
The programme envisaged for	1970 <b>i</b> s	as follows:-
Sunnybank Road: Bodsitters One-bedroomed flats Two-bedroomed flats Three-bedroomed flats	4 4 10 2	20
Field Lane, Stage 3A: One-bedroomed flats Two-bedroomed bungalows Cne-bedroomed bungalows	30 4 2	36
Field Lane, Stage 3B: One-bedroomed bungalows Two-bedroomed bungalows Two-bedroomed houses Three-bedroomed houses Four-bedroomed houses One-bedroomed flats Two-bedroomed flats Warden's flat		133
Whinney Hill: One-bedroomed bungalows Two-bedroomed bungalows Three-bedroomed houses One-bedroomed flats Two-bedroomed flats Warden's flat	73 14 49 120 77 1	334 (This will oxtend into 1971)
Clifton Common: Cne-bodroomed flats	20	<u>20</u> 543

In addition to the 136 houses built by the Council, 187 were built by private enterprise.

There were 1Cl applications for standard grants this year, and 78 were approved. Full particulars are contained in the Chief Public Health Inspector's report.

# INSPECTION AND SUPERVISION OF FOOD.

# Premises for the Manufacture, Preparation and Sale of Food.

Promises connected with food have been visited regularly, and 651 visits were made to the various types of food premises. This compares with 715 visits made in 1968. A great many improvements were made to food premises and details of those made as a result of formal action are given in full by the Chief Public Health Inspector.

#### Milk Supply.

Regular samples are taken from Distributors for bacteriological examination and also for the Methylene Blue test, which is an indication of keeping quality, and unsatisfactory samples are reported to the Ministry of Agriculture, Fisheries and Food. The T.T.C. test for identifying contamination by antibiotics was begun in 1969.

#### Ice Cream.

Che premises was registered for the manufacture of ice cream and regular routine inspections of the premises were made. There are now one hundred and four premises registered for the sale and storage of ice cream.

A total of 33 samples of ice cream were taken for examination and all were found to be satisfactory.

No coliform organisms were found in the 10 samples of "iced lollies" submitted for examination. None of the "iced lollies" was submitted for chemical examination.

# Meat and Other Foods.

A detailed statement regarding the action taken with regard to meat and other foods is given in the Chief Public Health Inspector's report. Condemned meat is sent for processing, except for livers which are sent to a local mink farm. Other waste food, along with kitchen waste, is dealt with in the plant of a neighbouring County Borough.

#### Adulteration.

The administration of the Food and Drugs Act is carried out by the West Riding County Council, samples being taken by our Public Health Inspectors.

#### Chemical and Bacteriological Examination of Food.

Samples of food for chemical and bacteriological examination are taken by the County Council.

# PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASES.

Although many factors, such as better housing, improved diets and increased social education, have played their part in reducing the number of cases and deaths from certain notifiable diseases, there is no doubt that the major part has been that of active immunisation.

This has been demonstrated most vividly in the case of Diphtheria. In the early 1940's, there was a dramatic fall, both in the number of cases and the percentage of deaths, immediately following upon the first major immunisation campaign against the disease.

#### Diphtheria Immunisation.

There has been no case of Diphtheria notified in Brighouse since 1950.

As last year, the figures of children immunised are given in two groups, the first group being children who have received either and initial or booster dose in the last five years, and the second group those who were immunised at a date preceding this.

Number of children at 31st Docember, 1969, who had completed a course of immunisation at any time before that date (i.e., at any time since 1st January, 1955):-

Ago at 31.12.69.	Undor 1.	1 - 4	5 <b>-</b> 9	10-14	Under 15.
i.c. Born in Year	1969.	1968–65.	1964-60	.1959-55.	Total.
Λ. 1965-1969 Β. 1955-1964	18 -	1540 -	1946 183	246 1421	3750 1604

New immunisation schedules were introduced in April, 1968. Primary courses are now completed at fourteen months of age instead of six months, as previously, and this has resulted in a considerable fall in the number of courses completed this year. Only 98 children completed a full course of primary immunisation against Diphtheria, Whooping Cough and Tetanus by Triple Vaccine. In addition, seven children were immunised separately for Diphtheria/Tetanus, and 359 were given a reinforcing dose against Diphtheria.

The prophylactics used were three doses of Triple Vaccine (Diphtheria and Totanus Toxoid and Pertussis Vaccine) for children under five years of ago.

# Vaccination against Smallpox.

Records were received in respect of 128 primary vaccinations and 14 re-vaccinations carried out on persons under the age of sixteen years in the Brighouse area. This compares with last year's figures of 238 primary and 19 revaccinations. The figures no longer give a complete picture of the number of vaccinations carried out in the district as records are only available for persons under 16 years of age and for travellers.

#### B.C.G. Vaccination against Tuborculosis.

B.C.G. Vaccination was offered to 748 twelve-year-old and thirteen-year-old schoolchildren in the Division. Parents of 569, or 76%, consented to this valuable measure, as compared with the County average for 1968 of 81.4%. Of these children, 548 were tested. Fifteen of them, or 3%, were found to be positive reactors and presumably had been

exposed to the disease at some time, and 503 with negative reactions were given B.C.G. vaccination.

Heaf testing and vaccination of contacts were also carried out.

Forty-two child contacts received skin tests. None of these were positive. Fifty-one children received B.C.G. vaccination, including nino babies not previously given a skin test.

#### Vaccination against Poliomyelitis.

In the course of the year, records were received in respect of 228 persons in the Division who had received three doses of oral vaccine, and, in addition, a further 745 children were given booster doses.

#### Vaccination against Measles.

Measles vaccine became available in April, 1968, for young children, and later in the year the vaccination scheme was extended to include children who had not previously had Measles. There was quite a good response but, unfortunately, during the latter half of 1969, the scheme had to be suspended owing to scarcity of supplies of vaccine.

#### NOTIFIABLE DISEASES.

#### Scarlet Fever.

Scarlet Fever was theinfectious disease most prevalent during 1969, and, altogether, twenty-six cases were notified during the year. At present, this infection continues its mild course.

### Measles.

There were thirteen cases of Measles notified during 1969.

#### Infective Jaundice.

This disease became notifiable during 1968, and nine cases were notified during 1969.

# Whooping Cough.

Only two cases of Whooping Cough were notified during the year. In one of these cases the patient had completed a course of vaccination. Whooping Cough vaccination does not give full protection but it has the effect of delaying the incidence of Whooping Cough until later in childhood, when complications are much less likely to occur, and, in addition, has caused a dramatic reduction in the number of cases.

#### Sonne Dysentery.

Six cases of Sonne Dysentery were notified during the year.

#### Tuberculosis.

The statistics relating to Tuberculosis are presented in tabular formin Table 11.

No action has been found necessary under the Public Health (Provention of Tuberculosis) Regulations, 1925, nor under the Public Health Act, 1936, Section 172.

During 1969, notifications were received in respect of seven cases of Rospiratory Tuberculosis, four males and three females, the same number of cases as in 1968. In addition, one respiratory case transferred into the district, eight respiratory cases were transferred out, and sixteen respiratory cases recovered during the year and were removed from the register. Nine cases died during the year. The number on the register was reduced by twenty-five to ninety-four.

There were two cases of Mon-Respiratory Tuberculosis notified during the year.

The Divisional Care Committee continued to do good work and distribute clothing, coal and food parcels to needy people. Christmas parcels were also distributed as usual and an annual day trip to the seaside, for patients and their families who are unlikely to have a holiday any other way, took place.

# Mass Radiography Survey.

The Mass Radiography Unit of the Leeds Regional Hospital Board visited the district in July, and sessions were hold at the Brighouse Health Centre, T.F.Firth & Sons, Ltd., Kossett Carpets Ltd., Brookfoot Dyeworks and J.Blakeborough & Sons, Ltd.

I give below the results supplied by the Unit. It is not possible, however, to draw any conclusions at all from such evidence since the persons examined constitute only a small proportion of the population and are not necessarily representative of the population as a whole. The information given is in respect of people actually examined during the survey and may, therefore, include persons normally resident in other areas.

# ANNUAL REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR PUBLIC CLEANSING AND SALVAGE OFFICER

FOR THE YEAR 1969

To His Worship the Mayor, Aldermen and Councillors of the Borough of Brighouse,

I have pleasure in submitting my fourteenth Annual Report on the Environmental Health and Public Cleansing Services - for 1969. As is customary, the portion of the report dealing with the former service is in respect of the calendar year, while that for the Cleansing Service is in respect of the financial year ending 31st March, 1970.

This report can only give a brief outline of the work carried out during the year. Once again nearly 20,000 visits were made by members of the Department and these visits were supplemented by thousands of unrecorded interviews carried out at the office for receiving complaints and giving advice. As new legislation and changing trends seem to place more duties on our hands each year, the pressure under which we work gets greater and I wish, therefore, to pay especial tribute to the loyalty and devotion to duty of the members of my staff who I know have each constantly given service to the Department of a high calibre so that the results reported in the following pages could be achieved.

I also wish, once again, to thank the Chairman, Vice Chairman and Members of the Health Committee for their continued confidence, interest and support during the year. To the other Chief Officers of the Council and members of their departments to whom on many occasions I, and members of my staff, have turned for information or advice or assistance, I say thank you.

Finally, I wish to particularly record my sincere appreciation to Dr. Gordon, Medical Officer of Health in 1969, for his advice and encouragement, and wish him well in his new appointment in Ireland.

I am, Mr. Mayor, Ladies and Gentlemen,

Your obedient servant,

W. JENNINGS,

Chief Public Health Inspector, Public Cleansing and Salvage Officer.

# WATER:

#### PUBLIC SUPPLY:

The Borough of Brighouse is supplied with water from the Calderdale Water Board Reservoirs and during the year under review a number of routine samples for Bacteriological Examination were taken from the various Wards in the Borough, with the following satisfactory results:-

Ward	Number of Samples Submitted	Number Satisfactory	Number Unsatisfactory
Central Clifton Hipperholme Hove Edge Lightcliffe Longroyde Southowram Woodhouse	3 4 6 3 4 3 1 5	3 4 6 3 4 3 1 5	- - - - - - -
Totals	29	29	=

#### PRIVATE WATER SUPPLIES:

During the year 49 samples were taken from the private water supplies serving 13 houses, 1 food premises and 4 other factories:-

Number of	Coliform Count	B. Coli. Count
Samples	per 100 ml	per 100 ml
27 3 4 2 3 1 1 1 1 1 1 1	0 1 1 2 3 5 5 7 8 25 35 180+ 180+	0 0 1 2 3 0 5 3 1 25 11 35 180+

Based on the classification suggested by the Ministry of Health for non-Chlorinated piped supplies the 30 results included in the first two lines would be considered satisfactory ones. However, these results are from sources which over the years have given unsatisfactory results and there can, therefore, be no complacency.

Some progress was made during the year because the four houses at Hollyroyd, Church Lane, Southowram were finally supplied with town water, one house with a private supply was closed and a demolition order was placed on another house with a grossly polluted private supply.

The following are the localities of the private water supplies:-

Brighouse town centre - 1 factory. Water used for auxiliary purposes only.

Public supply available for general needs.

Ashgrove, Elland Road - 4 industrial premises (public supply now used for some purposes in one factory), 11 houses and 2 farms.

Southowram - 5 houses.

Clifton - 2 houses, 1 quarry (one house not occupied at year end).

Rastrick - 1 house (not occupied for many years).

The provision of a mains supply of water to houses, farms and industrial premises in the Ashgrove area is now most desirable, particularly as a main supply was laid from Elland as far as the Rawsons Arms Inn some years ago. It is not so much the number of houses in this area that one must have regard to as the combined number of houses, farms and industrial premises.

# EXAMINATION FOR PLUMBO-SOLVENCY:

1 sample of water from the public supply was submitted for special examination for plumbo-solvency and details of the same are as follows:-

		Approx. length		Result Examinat	
Supply	Date Sample Collected	Address at which collected	of lead service pipe	Lead contents (Grains) per Gal.	pH Value
After standing in pipe all night	30.10.69.	1, Victoria Place, Rastrick.	30 feet	Nil	6.5
After standing in pipe for measured period of $\frac{1}{2}$ hour	30.10.69.	1, Victoria Place, Rastrick.	30 feet	0.02	6 <b>.</b> 5

## FOOD INSPECTION AND SUPERVISION:

#### MILK SUPPLY:

#### REGISTRATION:

There are 95 names on the Register of Distributors of Milk.

#### BACTERIOLOGICAL EXAMINATION OF MILK:

During the year 149 samples of "Untreated" milk were taken in the Borough by Officers of this Department for examination at the Public Health Laboratory, Wakefield. These samples were submitted for examination by the prescribed Methylene Blue Test. Ten samples could not be tested due to the temperature having exceeded that allowed, and 14 could not be tested because of a fault in the overnight water bath at the Laboratory. Of the 125 tested, 115 were satisfactory and 10 failed to pass the test.

All results of milk samples, whether satisfactory or unsatisfactory, were notified to the dealers concerned, and in the latter case a further sample was taken as soon as possible. Where this was also unsatisfactory the results were notified to the Milk Production Officer of the Ministry of Agriculture, Fisheries and Food with a request for a visit to the farm premises to check on production methods.

is the West Riding County Council sample milk retailed by dealers licensed by them it is exceptional for samples of heat treated milk to be taken by Officers of this Council. However, 104 samples were taken of milk from a local firm's tea machines. The milk used in the machines was "Pasteurised" but as the samples were taken from the actual tea machines for purposes of assessing hygiene standards, the milk could not be so classed.

# BRUCELLA ABORTUS:

During 1969, Brucella Abortus organisms were detected 10 times in raw milk supplies as a result of routine milk sampling, and 3 times in Brighouse produced milk by other Sampling Officers. Immediately positive results were received the producers were visited and steps taken to ensure whether the co-operation of the farmer in eradicating the condition could be expected. In every case co-operation was forthcoming and thereafter there was no delay in testing every milk cow in the herd and finding the offending cows. On one occasion it was considered necessary to serve a Notice under Article 20 of the Milk and Dairies (General) Regulations 1959. In all, 28 cows were found to be secreting Brucella orgamisms. It is usual to find that when a Brighouse producer-retailer's herd is affected, it is only from the odd cow - regular monthly sampling of the milk in the district ensures locally produced and retailed milk generally has a good record.

In all, 890 samples were tested by the "Ring Test" of which 645 were negative, 45 doubtful and 199 positive, while one was unsuitable. Of the samples subsequently submitted to the Culture Test, 174 were negative and 44 were positive, 5 were overgrown.

# T.T.C. TEST:

For the first time, the laboratory commenced to apply this test to routine raw milk samples with a view to finding if anti-biotics were present in the milk. Seven samples of the 110 tested were positive to the test. Three of these positive samples were taken on one day from one producer, and in total three milk suppliers were concerned - two of these twice. Immediate advice was given to the milk producers of the result of the samples, the reason for the test, and the fact that sale of milk containing anti-biotics could offend Section 2, Food and Drugs Act, 1955.

#### CHEMICAL EXAMINATION OF MILK:

The work in connection with the sampling of milk continues to be administered by the West Riding County Council's Inspectors and myself, the County Council bearing the cost of sampling and also providing any legal assistance necessary.

Thirty samples were submitted for analysis, 28 of which were informal samples and two formal samples. The following is a summary of the results compared with the statutory standard:

	Total Solids	Solids not fat	Milk Fat
Formal Standard	11.50	8.50	3.00
Average of 30 samples	12.46	8.67	3.79

All informal samples, except three, were classed as genuine. Two formal samples were subsequently taken at the request of the County Council as a result of the above adverse reports, but both were genuine.

#### MEAT INSPECTION:

During the year 782 visits were made to the slaughterhouse to inspect meat, compared with 706 visits the previous year.

The Council have generally adopted the maximum meat inspection charges (i.e. Beasts 2/6d; Sheep 6d; Pigs and Calves 9d) but so far as the Slaughterhouse at the Lees is concerned, a special charge per animal is made as follows:- Beasts 2/-; Sheep 4d; Pigs and Calves 6d.

Inspection of every animal slaughtered has been maintained for many years in the Borough and this, together, now, with stamping of carcases afterwards, has continued.

The following tables give details of the animals slaughtered, of inspections and causes of condemnation:-

# 1. Monthly Summary of Animals Slaughtered and Inspected:

<sup>\*</sup> Slaughterhouse closed for 3 months for extensive alterations.

# SLAUGHTER OF ANIMALS ACT, 1958:

Eight persons are licensed to slaughter animals under the Slaughter of Animals Act, 1958. None of these licences extend to the slaughter of horses.

# POULTRY INSPECTION:

Arising from the increasing amount of poultry slaughtered in many parts of the Country, more attention is being paid to premises used for this purpose, and to inspection of poultry meat.

There are, however, no poultry slaughterhouses in the Borough.

The following tabulated list gives the number of the various types of food premises in the Borough, together with the information called for in Circular 1/66 of the Ministry of Health:

·		Number of		Number of
·		Premises	Number of	Premises
•	Total	which	Premises	which
•	Number	comply with	to which	comply with

Boarding Houses	2	2	2	2
Slaughterhouse	1	1	1	1
TOTALS	394	394	393	393

In addition, there are an average of fourteen stallholders selling food in the local Market.

During the year, 29 visits were paid to bakehouses, 64 to butchers' shops, 32 to fried fish shops, 124 to grocery shops and general stores, 46 to greengrocers' and fishmongers' shops, 82 to cafe, hotel and canteen kitchens, 48 to confectionery and sweet shops, 37 to licensed premises and clubs, and 17 to other food preparing premises, and these, together with the visits paid to the ice cream premises, food hawkers and the market made a total of 651 visits to food premises during the year.

A list of some of the improvements in such premises, and to food handling, secured during the year follows, but the list only gives the improvements effected following written or verbal notification of offences, and many more improvements resulted from suggestions of the Public Health Inspectors and from their discussions with the occupiers:-

# List of improvements and unsatisfactory conditions remedied in Food Premises in 1969:

Walls and ceilings repaired		• • •		3
7.C. walls and ceilings cleansed/redecorated			• • •	8
Hot and/or cold water provided to sinks	• • •	• • •	• • •	5
Sinks renewed/repaired		• • •	• • •	5
Hand washing facilities provided/renewed/improve	ed			6
Food exposed to contamination remedied	• • •	• • •		13
Food trays exposed to contamination remedied	• • •	• • •		2
Warning given re smoking in food room	• • •			2
Walls and/or ceilings of food room cleansed/rede	ecorate	d		26
Floors cleansed and/or recovered			• • •	15
No name and address on market stall remedied	• • •	• • •		3
Accumulation of rubbish reroved			• • •	3
Equipment cleansed/renewed/repaired		• • •		9
First aid facilities provided		• • •	• • •	4
Defective roof repaired				2
Warning re sale of unsound food			• • •	4
W.C. flush pipes repaired				1
V.C. doors repaired		• • •		1
•				

Artificial light provided to W.C		• • •	1
T.C. cistern renewed/repaired	• • •		1
Food not of quality demanded			4
"Wash Your Hands" notice provided in W.C		• • •	5
Window repaired			1
Swill bin provided			1
Artificial lighting provided/repaired/improved			2
Domestic animal removed from slaughterhouse premises			1
Food in refrigerator kept above loading line remedied	• • •		1
Improper transport of offal remedied	• • •	• • •	1
Unlicensed food hawkers detected	• • •	• • •	4

In one instance where a mouse dropping had been detected in a Bakewell Tart, successful legal proceedings were taken under the Food Hygiene (General) Regulations, 1960 in respect of conditions found in the bakehouse where the tart had been manufactured:-

Regulation	14(5)	) Display	of W	ash	Your	Hands	notice	fine	£10
Regulation	6(1)	(c) Dirty	food	tra	ìу			fine	£10
Regulation	2:(1)	) Dirty fl	oor					fine	£10
Regulation	24 A	ccumulatio	n of	dir	rt -			fine	£10

Due to pressure of other work the number of visits paid to food premises was only 651. This figure is again less than half of what it should be, and once more this was the sphere of the Department's work that has suffered as a result of ever increasing duties falling to the inspectorate.

There were, of course, occasions when visits to food premises took first call over all other work. Complaints of alleged unsound food or food containing foreign bodies always receive immediate attention in any year. Meat Inspection is a Statutory luty and, of course, incidents of alleged food poisoning take first prior ty of Inspectors! time.

#### MARKET:

Ninety-three visits were made to the twice-weekly open-air market. There was an average of 14 food traders, including one butcher, one fish-monger, one cheese stall, one egg stall, one cooked meat stall, three confectionery stalls, one grocery stall and six greengrocery stalls.

The market has a limited life as it will soon be affected by road improvements.

# FOOD HAWKING:

Section 76, West Riding County Council (General Powers) Act, 1951 is in force in the Borough and 38 persons or firms are registered to hawk food.

- 14 persons or firms are licensed for the hawking of greengrocery and fish.
- 4 persons or firms are limensed for the hawking of meat and meat products.
- 8 persons or firms are licensed for the hawking of confectionery.
- 2 persons or firms are licensed for the hawking of grocery.
- 10 persons or firms are licensed for the hawking of ice cream.

During the year 39 visits were made to food hawkers while they were selling food in the Brighouse area.

#### UNISOUND FOOD:

The following unsound food, additional to that at the slaughterhouse was found unfit and surrendered by food traders:-

- 44 time and packets and veretables 194 lbs. of meat
- 5 tine and packets of milk and milk products
- 63 packets of ice cream
- 324 tins of fruit
- 62 tins and packets of meat and meat products

Unsound meat condemned at the slaughterhouse remains the property of the owners but is disposed of satisfactorily under the supervision of your Inspectors and in accordance with the Meat (Staining and Sterilisation) Regulations, 1960 as follows:-

- (a) Livers affected with distomatosis only to a local milk breeder
- (b) All other condemned meat to an approved firm dealing in inedible meat for digestion

On the 1st November, 1969 the Meat (Staining and Sterilisation) Regulations, 1960, as amended, were superseded by the Meat (Sterilisation) Regulations, 1969.

REGISTRATION OF FOOD PREMISES - Section 16, Food and Drugs Act, 1955:

## (a) PREPARED FOODS:

Thirty-one premises are registered for the preparation or manufacture of sausages, potted, pressed, pickled or preserved food intended for sale.

The number of visits to these premises was 93.

# (b) ICE CREAM:

105 premises are registered under the above Act, one for the manufacture, storage and sale of ice cream, and 104 for the storage and sale of ice cream.

Ten inspections of the one ice cream manufacturer's premises, where the heat treatment process of manufacture is carried out, revealed that conditions were satisfactory. Twenty-three visits were made to ice cream retailers who for the most part deal with the pre-packed products.

A total of 33 samples of ice cream were submitted for bacteriological examination by the Methylene Blue Reduction Test, and particulars are given below:-

Produced	No. of Samples	Grade I	Grade II	Grade III	Grade IV
In the Borough Outside the Borough	9 22	9 22	-		-
TOTAL	31	31		-	-

Once again these results indicate that both locally produced and other samples of ice cream were bacteriologically satisfactory when sampled.

Ten samples of iced lollies were also submitted for bacteriological examination and all were reported as satisfactory.

THE LIQUID EGG (PASTEURISATION) REGULATIONS, 1963:

There are no liquid egg pasteurisation plants in the district.

#### THE ILPORTED FOOD REGULATIONS, 1968:

During the year these Regulations affected Brighouse as containers with imported food from Denmark were being consigned, twice weekly, to a local Depot, but not necessarily inspected at the port of import. Only Bacon was concerned and nineteen visits were made to inspect imported food.

#### EXAMINATION OF OTHER FOODS:

A number of complaints regarding food were received during the year. Reputable manufacturers and retailers go to great lengths to produce a satisfactory product but a perusal of the complaints made to this Health Department and the conditions detailed in the following list show there is still the occasional slip.

Food

Bakewell Tart

#### Condition

Rodent dropping in Bakewell Tart.

## Remarks

Retailer prosecuted under Sec. 2, Food and Drugs Act, 1955. Fine £10.

Food	<u>Condition</u>	Remarks
Custard Tart	Dark staining on pastry of custard tart.	Warning given by Chief Public Health Inspector to retailer.
Lard	Small quantity of dust mixed with lard - including grit and broken down wood fibres.	Submitted by baker. No further action.
White loaf	Foreign body - fragments of bran.	Harmless and wholesome but presence irregular. Letter to baker.
Fish and Chips	Fish overcooked. Chips contained some skin.	Not unsound. Fish frier
Prepacked "Edam" Cheese	Mould growth on surface.	informed of complaint. Warning letter to retailer sent by Chief Public Health Inspector.
Tin of Irish Stew	Screw in tin.	Warning letter sent to manufacturers by Health Committee.
2 lbs. packet of Sugar	Dark colour of sugar.	Due to processing fault. Discussion with manufacturer.
Rum Truffle	Mould growth in truffle.	Retailer prosecuted under Sec. 2, Food and Drugs Act 1955. Fined £10.
Brown loaf	Mould growth on loaf.	Warning letter sent to manufacturer by Chief Public Health Inspector.
Bilberry Pie	Beetle in pie.	Warning letter sent to retailer by Health Committee.
Bottle of milk	Polystyrene in bottle of milk.	Warning letter sent to manufacturer by Health Committee.
Packet of "Dinky Rolls"	Mould growth on surface of rolls (posted to Department by complainant).	Discussed with retailer.
White teacake	Dark stain - from baking tins.	Substandard. Warning letter sent to bakers by Chief Public Health Inspector.
Prepacked shoulder of pork	Decomposing - smell.	Verbal warning to retailer.
Slab cake	Mould growth on cake.	Warning letter sent to retailer by Chief Public Health Inspector.
Milk bottle	Mould on internal surface of milk bottle.	Warning letter sent to producer and retailer by Chief Public Health Inspector.
Apple pastry	Mould growth in apple pastry.	Prosecuted under Sec. 2, Food and Drugs Act 1955. Fined £10.
Piece of raw beef - prepacked	Alleged decomposing (complaint not made immediately).	Letter sent to retailer by Chief Fublic Health Inspector.
Prepacked pork pie	Mould growth in pic.	Warning letter sent to retailer by Chief Public Health Inspector.
Loaf of bread	Mould growth in bread.	Warning given to Bakery by Chief Public Health Inspector.

Food	<u>Condition</u>	Remarks
Carton of Yoghurt	Cockroach in Yoghurt.	Warning sent to manufacturer by Chief Public Health Inspector.
Rich fruit loaf	Mould growth on surface.	Warning letter sent to manufacturer and retailer by Town Clerk.
Tin of garden peas	Stalk and leaf in peas.	Letter sent to producers by Chief Public Health Inspector.
Butter	Pale colour and abnormal taste.	Slightly substandard. Letter sent to retailer by Chief Public Health Inspector.
Tin of pineapple	Inside surfaces of tin badly etched and lid rusty. Abnormal odour. High iron content.	Unsatisfactory, Letter sent to Ministry of Agriculture, Fisheries and Food by Chief Public Health Inspector for report to exporting country.
Cream cake	Mould in cream cake.	Prosecuted under Section 2, Food and Drugs Act, 1955. Fined £10.

In 11 of the above instances the foods were submitted to the Public Analyst for examination. In four instances successful legal proceedings were taken compared with one case the previous year.

#### ATMOSPHERIC POLLUTION:

#### 1. MEASUREMENT OF ATMOSPHERIC POLLUTION:

Whereas the Council formerly operated five Deposit and five Lead Peroxide Gauges, and later two gauges of each type - both adjacent to Snoke Control Areas - all gauges have now been discontinued as so much development has taken place in the immediate vicinity of the gauges that no longer were the areas comparable with when the gauges were installed.

#### 2. INDUSTRIAL POLLUTION:

## (a) Chimneys:

Seventy-three observations of smoke were taken in 1969. The following is a summary of 13 of which records were kept:

Number of chimneys at which observations have been taken ...

Total number of observations of which records were kept ...

(a)	Observations of half-hour period	10
(b)	Observations of less than half-hour period	3
(c)	Observations of eight-hour period	
Num	ber of contraventions:	
(a)	Black smoke (Ringelmann Shade 4 or darker) exceeding two minutes per half-hour	•••
(b)	Continuous Dark smoke (Ringelmann Shade 2 or darker) for more than four minutes	3

6

13

(b) Continuous bark shoke (Ringelmann Shade 2 of darker) for	_
more than four minutes ,	3
(c) Dark smoke (Ringelmann Shade 2 or darker) for more than	
permitted period in eight hours	-
Number of notifications of offence served	2
Number of prosecutions	nus

During the year 60 visits were made to boiler plants in addition, or subsequent, to the smoke observations taken.

No "black" smoke offences were detected: only 9 years ago, 12 were found. Three "dark" smoke emissions in excess of that allowed were observed - nine years ago the figure was 36.

The 1963 report gave figures to show the considerable progress that had been made in the 7 year period of grace allowed under the Act. Now, every year, more industrial premises are included in Smoke Control Areas and industrial smoke is no longer any major problem as it was a decade ago when the Clean Air Act came into force.

# (b) Smoke other than from Chimneys:

For some years the Council have had powers to control smoke other than from chimneys under Section 27, West Riding County Council (General Powers) Act, 1964. This has proved very useful legislation in practice, and a number of observations were taken during the year. In two cases "black" stoke was emitted and warnings given to the firms concerned.

The powers of Section 1, Clean Air Act, 1968 also became operative during the year, but being weakened by conditional defences are not so useful as the private Act powers we worked so hard to get a few years ago, and which we still retain.

# (c) Notification of New Furnaces:

Thirteen notifications of new furnaces were received under Section 3(1) of the Clean Air Act, 1956.

These notifications embraced:

Type						Number
Cil fired boilers	• • •	• • •	• • •	• • •		10
Gas fired boilers	• • •	• • •	• • •		• • •	2
Coal fired boilers	with me	echani.c	al stol	ter		1

The above notifications only included one really large boiler plant.

# (d) Prior Approval of New Farnaces:

No applications were received for prior approval of new furnaces in 1969.

# (e) Height of Chimneys:

Only one plan involving a new chimney was received for approval of chimney height during the year 1969. After the developers had agreed to higher the height of the chimney the new height was approved.

# (f) Processes exempt from the Clean Air Act, 1956:

Three works in the Borough continue to be exempted from the provisions of the Act and, therefore, come within the scope of the Alkali Inspectorate in so far as these processes are concerned.

The exemptions comprise:-

- (1) 2 premises dealing with ceramics
- (2) 1 premise dealing with chemicals

The coal fired intermittent kilns of the heavy clay industries included in (1) above continued to give rise to frequent complaints, but the chemical process (2) was of no significance at all so far as smoke production is concerned.

Assurance has been given by the H.M. Alkali Inspectorate that by mid 1970 the ceramics trade would be expected to have reduced smoke missions to an acceptable amount. This assurance was received with satisfaction as Hippernolme is due to become Smoke Controlled by mid 1970 and arnal Oak by mid 1971.

However, one ceramic works, which had for many years given rise to considerable smole, and complaint, closed down during the year and it was at the same feeling of sadness that one watched the demolition of the chimneys are hid got to know so intimately over the years: we never wished Clean Air to be achieved by tris method.

# 3. SMOKE CONTROL AREAS:

No.13 Smoke Control Order, which covers Thornhill Briggs, Waring Green and Lane Head and embraces some 1,318 houses, became operative on the 1st of June, 1969. Hipperholme No.14 area, which covers virtually all the built up portion of Hipperholme and Lightcliffe not already controlled, was confirmed during the year. It is scheduled to become operative on the 1st of June, 1970.

The table on page 38 gives progress to date and shows that over 4/5ths of the houses in the Borough are now covered by Smoke Control Orders. As the rural areas of the Borough have been left until last only half the acreage is covered by Smoke Control Orders, but this will rapidly increase when the large, more rural, areas of Clifton are covered in 1970.

When one looks at the map of the Borough on which Smoke Control Areas are marked, it is easy to see we are now well over the hump and on the last straight to home. Clean Air zones have affected so far over 80% of the householders in the Borough, and our work in this field has been made so much easier by the co-operation of householders, which has been far better than in many local authorities.

## 4. GENERAL:

The Borough Council still has a seat on both the Executive Committee of the West Riding Advisory Council for Clean Air and Noise Control and the Council of the Yorkshire Division of the National Society for Clean Air, the Chief Public Health Inspector being the appointed representative in each case. In the case of the former Council, he is currently Deputy Chairman.

#### LEGISLATION:

The Housing Act, 1969 came into force on the 25th August, 1969. Basically this Act was aimed at preserving good older houses from deterioration that would lead to Slum Clearance. It generally eased both the discretionary and standard grants, though in the latter case it and now require a more positive standard of fitness, and provided for a different approach to area improvement in view of the reluctance of Local Authorities to implement the Improvement Area powers. For the first time legislation provided for grants for environmental improvement. Provisions for increasing rent of houses having standard amenities and fit are included but once again are complicated and must be difficult to understand by the small owner and occupier.

# SLUM CLEARANCE:

# (a) Progress during the year 1969:

Eight areas involving 83 houses were inspected and subsequently represented during the year. In each case Orders were made by the Council:-

Locality	Houses in Area	Type of Order	Houses in
Church Lane, Southowram	5	Clearance	. 5
Queen Street	5 :	Compulsory Purchase	5
Dale Street and Water			
Street	27	Compulsory Purchase	<b>4</b> 29
Milnes Yard	17	Compulsory Purchase	20
Woods Yard and Balls			
Yard	6	Compulsory Purchase	6
Dewsbury Road	5	Clearance	5
Mitchell Street	8	Compulsory Purchase	8
Croft Place	10	Compulsory Purchase	10
	83		88
•	-		Security (1977) (1986)

Twenty-eight houses in confirmed areas were demolished, and 81 families with 198 persons were displaced.

Six houses were represented under Section 16, and one dwelling under Section 18. Twenty-two houses which were the subject of Demolition Orders and 10 which had justified certificates of unfitness being granted, were demolished. Nine were closed. In addition, 6 local authority owned houses, all recently purchased, were certified as unfit for closing pending subsequent demolition. Twenty persons from 9 families were displaced from houses to be closed and 20 families embracing 38 persons were displaced from individual houses to be demolished.

One Clearance Order was determined after a satisfactory scheme for converting 6 houses into one had been submitted and completed. These 6 houses had been "protected" properties, yet nevertheless their condition was such that the Minister, knowing this, had confirmed the Clearance Order. The scheme to renovate the property was welcomed and the resulting dwelling was an excellent example of what can be done if adequate finance is available and the environmental position of the dwelling justifies retention.

In all, 111 families of 257 persons were displaced from houses in Clearance or Compulsory Purchase areas, or houses the subject of Demolition or Closing Orders, or Certificates of Unfitness. Fighty-five of the families were rehoused by the Corporation.

# (b) General Position:

The position at the end of 1969 was as follows:-

(a) Houses scheduled for action before 1971	• • •	114 585
(b) Houses scheduled for action 1971-75 (c) Houses scheduled for action 1975-80 (d) Houses recommended for eventual action to complete	• • •	461
Slum Clearance Programme	•••	582
Total houses remaining to be dealt with at 31st December, 1969 to complete the programme		1,742

With the aid of Improvement Grants and Standard Grants it will be possible for a fair number of houses in Section (d) to be removed from the list, if they are improved, and Grants under Section 9(7) will enable action of others to be deferred, possibly for many years, for the reason given later. The above figures should be interpreted with these possibilities in mind. They will certainly be encouraged in suitable cases.

Since 1956, 83 Clearance and Compulsory Purchase Orders involving 972 houses have been made, while in addition, 213 unfit houses have been dealt with by individual action under Sections 16, 17 and 18 of the Housing Act, 1957 or Certificates of Unfitness where the houses were Local Authority owned - a grand total of 1,185 houses, or an average of 84 per year.

# STANDARD GRANTS:

In conjunction with other Departments of the Council, this Scheme has once again been operated and 101 applications for standard grants were made and 78 approved during the year, compared with 99 and 84 last year, and 96 and 84 in 1967. Fifty-nine improvements by means of these grants were actually completed, compared with 77 last year. Since the inception of the standard grant scheme in June 1959, some 1,264 applications have been received and 1,020 houses have been provided with standard grant facilities. When one looks at this latter figure, it will be appreciated that nearly 1 in 10 of all the pre-war houses in the Borough have been improved with the aid of standard grants.

Brighouse has some 1,064 back-to-back houses without a separate proper kitchen and having only one living room and one or two bedrooms. Tenants over the years have often ensured two bedrooms by elementary partitioning of the sole bedroom, and in many cases have attempted to get rid of cooking, and sometimes washing up, from the living room by installing cookers at unventilated cellar heads, in an amateurishly constructed entrance to the living room at the foot of the bedroom stairs, or in the cellar.

Many of these houses are of the older type in poor repair and environmentally poorly situated and must be eradicated without hesitation. Some, however, are well constructed of good quality local sandstone and have generally been kept in good repair and are so stable that the structures could well outlast some modern houses now being constructed. If these houses are environmentally well situated it is considered that while they can never be "in all respects fit", they can provide useful units of accommodation for some years if given those amenities most of us now accept as essential. Moreover, being situated near to shops, places of worship and other amenities, and in a locality well known to occupiers and being cheaply maintained, these houses are very popular with older people, for whom they are particularly suited.

As referred to in the 1967 report, the Council made representations to the Minister of Housing and Local Government on two occasions for powers to enable them to provide at least the more important modern amenities to these houses in view of their expected life. In the Housing Act, 1969 the Minister has done just this in Section 9(7) and followed up the subsection by making a "general direction" to enable Local Authorities to give grants for the three "reduced standard" amenities in appropriate cases. Whether our representations had any influence in this decision we do not know, but immediately the power became available not only did the Council resolve to use it, but the Chief Public Health Inspector made a further case for the full amenities being made available under Section 9(7) in our case. By the year end the Ministry had just indicated that if the Council made a formal application for a "special direction" to give grants

for all seven amenities in suitable cases under Section 9(7) it would receive favourable consideration. In actual fact, the Minister's "special direction" was received in March, 1970.

Next year it is hoped to be able to give, to a good number of suitable houses, modern amenities under this Section.

During the year the Health Department took over the responsibility for receiving and checking accounts for standard grants, in addition to functions previously carried out.

#### DISCRETIONARY IMPROVEMENT GRANTS:

The Council do not operate the discretionary improvement grant scheme. For the last eleven years or so this sentence or words with a similar meaning have been included each year in the Annual Report. In respect of the year under review they still apply, but in 1969, when they considered the new Housing Act, 1969, the Council decided to commence making improvement grants again as from the 1st April, 1970, but to limit them to £750 for the first year. With very wide discretion now available to Local Authorities these grants will not only form and bring a new concept in housing and repair, but will call for considerable additional effort in the Department if there are any number of applications.

#### COMPULSORY IMPROVEMENT GRANTS AND IMPROVEMENT AREAS:

Consideration has been given in past years to declaring an Improvement Area but the Council then felt that the administration and technical difficulties of this procedure, together with the fact that there is an absence of suitable areas where such action would be worthwhile, did not justify the declaration of such an area. The Housing Act, 1969 has now replaced these powers with new ones, which in spite of the bait of the environmental grant, it is felt may not be completely successful as they lack enforcement powers.

The owners of the three houses, the tenants of which requested the Council last year to enforce the provision of standard amenities, eventually provided the same, voluntarily, during 1969.

One application was received from an occupier along similar lines in 1969, but though the owner had made an application by the year end it was complicated by a qualification certificate application.

# HOUSES IN MULTIPLE OCCUPATION:

In Brighouse still only about ten houses in multiple occupation are known about. Rooms are usually occupied only by single persons or couples. No doubt there are other cases of multiple occupation in the Borough, but in the absence of registration they are not known; were young children involved I as sure the Department would have heard about them. The problem remans, in total, not a particularly serious one, though there is an obvious need to improve the living standard in the individual case, and prevent overcrowding while this sub-standard living accommodation remains.

# COMMON LODGI'S HOUSES:

There are no common lodging houses in the Borough.

#### OVERCROWDIIG:

There has again been no serious problem. From time to time individual cases of gross overcrowding have arisen but these have mostly occurred amongst families who have been evicted from, or left, other more suitable or larger accommodation.

Where statutory or serious moral overcrowding has arisen amongst local families with current application for rehousing, as a result of normal family increases, the Housing Committee have invariably been most helpful and five cases of statutory overcrowding were relieved by rehousing in Council houses in 1969.

Once again it must be reported that occupiers of controlled houses are not making use of these provisions as the figures given below show, and this is not surprising when one considers the complicated procedure involved, particularly for old people, in making and following through an application. Simplification of formal procedure for a Certificate of Disrepair is, it is considered, long overdue.

# Application for Certificates of Disrepair:-

2.	Number of applications for certificates Number of decisions not to issue certificates Number of decisions to issue certificates	· -
	(a) in respect of some but not all defects (b) in respect of all defects	
Λ	Number of undertakings given by landlords under paragraph

•	cancellation of certificates	. 1
8.	Objection by tenants to cancellation of certificates	. 1
	Decision by Local Authority to cancel in spite of tenant's	
	objection	
10.	Certificates cancelled by Local Authority	

# QUALIFICATION CERTIFICATES - HOUSING ACT, 1969:

If procedure for obtaining certificates of disrepair has been complicated and, therefore, probably the reason for the figures similar to those above year after year in not only our Annual Report, but in many others, then it seems the procedure for getting a "fair rent" fixed will be even more so as there are now two distinct procedures to be followed, one for those houses with the seven standard grant amenities and one for those about to be provided with the facilities, and for good measure the Rent Officer is brought into the procedure. By the end of the year one or two Standard Grant applications, in respect of tenanted houses, were already beginning to be delayed by this procedure. It is relevant that grants made under Section 9(7) referred to above will not be affected by the procedure as 12½ of the owner's costs on improvements may be added to the rent in these cases, and qualification certificates will not apply - nor could they in our cases.

The following table gives the cases dealt with from the 25th August, 1969 (when the provision became applicable) to the 31st December, 1969 in the form required by the Ministry of Housing and Local Government Circular 66/69:-

# Improvement cases:

Number of applications for qualification certificates under Section 44(2) under consideration at end of period	3
Number of certificates of provisional approval issued	-
Number of qualification cortificates issued under Section 46(3)	-
Standard amenities already provided:	
Number of applications for qualification certificates under Section 44(1) under consideration at end of period	7
Number of qualification certificates issued under Section 45(2) in respect of:-	
(i) dwellings with rateable value of £90 or more in Greater	
London or of £60 or more elsewhere (ii) dwellings with rateable value of £60 to less than £90	-
in Greater London or of £40 to less than £60 elsewhere (iii) dwellings with rateable value of less than £60 in	-
Greater London or less than £40 elsewhere	-
Exemption for low-income tenants from Section 54:	
Number of certificates issued under Section 55	_

## PET ANIMALS ACT, 1951:

# ANIMAL BOARDING ESTABLISHMENTS ACT, 1963:

## RIDING ESTABLISHMENTS ACT, 1964:

These three Acts are administered by the Department.

Three persons were licensed to keep Pet Shops, two to keep Boarding Establishments and one to keep a Riding Establishment. The necessary inspections have been made, and Messrs. J. McKinna and Son, Veterinary Officers, Huddersfield carry out appropriate inspections of the latter two Acts on behalf of the Council as requested.

#### DISEASES OF ANIMALS ACT:

Under the Diseases of Animals (Waste Food) Order, 1957 four persons are licensed to collect and boil swill. One visit was made to premises used for boiling swill during the year.

AGRICULTURE, (SAFETY, HEALTH AND WELFARE PROVISIONS) ACT, 1956:

There are no large farms, nor is there any influx of seasonal workers for agricultural purposes.

No specific complaints have been received of any insufficiency of sanitary accommodation on agricultural holdings.

#### NOISE:

The Council have powers to deal with noise nuisances under the Noise Abatement Act, 1960 and also under Byelaws relative to Good Rule and Government.

The following are details of the type of noise complaints dealt with:-

Noise from machinery	• • • •	• • •	• • •	10
37 1 0 7 3 1 1 7	••	• • •	• • •	4
Noise from animals		• • •	• • •	2
Noise from neighbours	••	• • •	• • •	2
Noise from source not apparent	••	• • •	• • •	2
Noise from amplifiers by Ice Cream salesmen			• • •	3

In all, 142 visits were made in investigating noise complaints.

#### SANITARY ACCOMMODATION:

The types of Sanitary Accommodation existing in the Borough other than fresh water closets are as follows:-

Waste water c	losets	• • •	• • • •	•••	• • •	1
Pail closets	(including 2	2 chemical	closets		• • •	95

67 houses still have pail or chemical closets and the others in use are at factories, firms and building sites.

The one waste closet is capable of conversion.

The large number of pail closets still existing must not be neglected and every encouragement is given to owners to convert them to water borne sanitation where, as is sometimes the case, they are not for houses likely to be the subject of Slum Clearance action.

# DRAINAGE:

819 inspections were paid during the year in connection with obstructed and defective drains and sewers, while 848 inspections were made of existing and new drainage.

In 77 instances use was made of the Smoke Test, colour was resorted to in 744 instances, and Olefactory Test was used 10 times.

Drainage work rose once again to a large degree as the result of complaints or call for assistance from owners or occupiers with smells, water in their buildings, flooded yards, or unusable conveniences. Investigation may be simple and the trouble solved in a few minutes, or it may take hours or even days or weeks - on and off - of painstaking investigation.

#### INFECTIOUS DISEASE AND DISINFECTION:

It was necessary to make 98 visits for the purpose of investigating Infectious Disease. The vast majority were of a routine nature.

# HEATING APPLIANCES (FIREGUARDS) REGULATIONS, 1953:

The Department administers these Regulations as the places where appliances contravening the Regulations are most likely to be met are in shops selling second hand goods. Such traders have been informed of the requirements of the legislation in previous years.

Unfortunately, such fires are sold cheaply and must be an attractive proposition for use where they are most likely to be a danger.

Watch has been kept throughout the year to ensure heaters that contravene the law are not displayed for sale, or sold, and none were seen this year.

## 1. PART 1 OF THE ACT:

The following are details of the inspections for purposes of provisions as to health:-

	Number	Number of				
Premises	on Register	Inspections	Written Notices	Occupiers Prosecuted		
(1) Factories in which Sections 1, 2, 3, 4 and 6 are to be enforced by Local Authority	6	8	j dana	ent		
(ii) Factories not included in (i) in which Section 7 is enforced by the Local Authority	232	37	6			
(iii) Other premises in which Section 7 is enforced by the Local Authority (excluding out-workers' premises)	4	11	-	· · ·		
	242	56	6	ventionalismationilities minimines vaid vantuuts ilmuusuvatinuu kana		

It will be noticed that only 6 factories now fall into the category where Sections 1, 2, 3, 4 and 6 are enforced by Local Authorities. Would it not be better for uniformity if these particular provisions were to be enforced by the same Authority in respect of all factories?

The only Section of the Act enforced by Local Authorities in all factories is that relative to sanitary conveniences. It is considered this power could well also be reviewed.

Cases in which defects were found:-

# OFFICES, SHOPS AND RAILWAY PREMISES ACT, 1963:

This Act provides a similar charter for office and shops workers to that the Factories Acts have provided for factory workers for far more years.

Table A gives the varying classes of premises registered in the Borough at the end of 1969 with the number of detailed or general inspections made, while Table B gives the total number of visits, and Table C gives the numbers employed in the varying classes of workplace. Table D shows that no applications for exemption from the requirements of the Act were applied for or granted, and Table E gives details of prosecutions. Table F shows the accidents reported. Only eight accidents were notified and one must presume that not all of them are coming to our notice. Where necessary, accidents are investigated and have to be coded in accordance with the procedure laid down by the Ministry of Labour, summarised and reported quarterly to the Ministry of Labour.

In Table G the contraventions detected and remedied during the year are detailed.

#### SHOPS ACTS:

These Acts which, apart from the provisions relating to sanitary accommodation, were previously administered by a Shops Act Inspector from one or other of the Council Departments on a part-time basis were, in 1965, passed to the Health Department for enforcement and all Public Health Inspectors are appointed Shops Act Inspectors.

160 visits were made under the Act and advice was given and informal action was taken on a number of occasions relating to Sunday opening, Closing Hours, Sale of Fish and Chips on Sundays, and early closing days. While it was not necessary to take any formal action, this legislation becomes more difficult to enforce each year that passes as shopping trends

69.

and trading methods change: both are so very much different from what they were only a decade ago. Modernisation of Shops Act legislation is required if enforcement action is not to bring any further illfeeling than it has in recent years in many instances in other areas.

#### HAIRDRESSERS AND BARBERS:

Section 120, West Riding County Council (General Powers) Act, 1951 is in force in the district and all persons carrying on the trade of Hairdressers and Barbers are required to register themselves and their premises with the Borough Council. Twelve Gentlemen's Hairdressers and 37 Ladies' Hairdressers are registered.

Thirty-eight visits were paid to these premises with a view to ensuring compliance with your Council's Byelaws relative to hairdressing hygiene, and premises and methods were generally found quite satisfactory.

#### PEST CONTROL:

# (a) INFESTATION AND DISINFESTATION:

Premises were disinfected during the year for the following reasons:

Fleas	• • •	•••	• • •	• • •	• • •	• • •	• • •	14
Wasps	• • •	• • •	• • •	• • •	• • •	• • •	• • •	24
Cockroache	s	• • •	• • •	• • •	• • • • • •			6
Flies	• • •	• • •	• • •	• • •	• • •	• •	• • •	2
Bees	• • •	• • •	• • •	• • •	• • •	• • •	• • •	2
Disinfesta	tion of	houses	on remo	oval	• • •	• • •	• • •	2
Plaster Be	etles	• • •	• • •	• • •	• • •	• • •	• • •	2
Hornets	• • •	• • •	• • •	• • •	• • •	• • •	• • •	1

The pest which was most prevalent in 1969 was again the wasp, a type of pest the Department were not called in to deal with in the past but now the service is there, residents obviously use it.

Large cities and town centres have, for some time, been plagued by Starlings and feral pigeons in increasing numbers, and action has had to be taken to reduce their numbers.

The position locally has been watched over the years and during 1969 it became necessary to acquaint the Health Committee of the fact that in one locality feral pigeons were homing and breeding to such an extent that they were becoming a nuisance and steps should be considered for reduction in their numbers. By the year end further increases had taken place and preliminary steps were taken to secure some reduction in the flock, by this time well over one hundred birds, by approved methods.

#### (b) RODENT CONTROL:

The following table summarises the work carried out during the year ended 31st December, 1969.

	-	TYPE	ES OF PROPI	ERTY	4					
		Non-Agricul tural								
<b>1</b>	Local Authori ty	including Council	All other including Business Premises	(1), (2)	Agri- cul tural					
1. Number of properties inspected as a result of: (a) Notification (b) Survey under the Act (c) Otherwise (e.g. when primarily visited for some other purpose)	28 88 25	349 703 1,960	121 304 1,137	498 1,095 ; 3,122	1 9					
2. Number of properties inspected which were found to be infested by: (a) Rats Reservoir Major Minor (b) Mice Major Minor	- 10 (8) - 12 (11)	- 187 (79) - 152 (89)	-	- (2) 267 (122)  230 (140)	1 (6) 					
3. Number of infested properties treated by Local Authority	. 22 (19)	339 (162)	136 (83)	479 (264)	1. (6)					

1969 saw a considerable increase in the number of properties treated for both rats and mice and figures for last year are given in brackets in the above table.

Warfarin has still formed the basis of treatment for rats, and no resistance to the poison has been recorded in this district, but due to previous failures with mice, narcotic poison was again used for the most part for this pest, with success.

(c) Your Council is a member of the West Riding Pests Control Committee and has been elected to the Executive Council - the Chief Public Health Inspector being its delegate.

#### SWIDMING BATHS:

There are now two swimming baths in the town - the Public Swimming Baths which have been in existence for many years and a new private learners' pool at Woodhouse Primary School, this latter pool having been opened towards the end of the year.

Twenty-four routine samples of water from the Bathing Pool of the Public Swimming Baths, Mill Royd Street, were submitted during the year for Bacteriological Examination, and the results are given in the table overleaf.

The recommended standard for swimming bath water is that no sample should contain any coliform organisms in 100 ml. of water and that in 75% of the samples examined from the bath the 24 hour count at 37°C per 1 ml. of water should not exceed 10 colonies, while in the remainder the count should not exceed 100 colonies.

Mon th	Point of Supply	Plate Count 24 hrs. 37°C Colonies per ml.	Coliforms in 100 ml.

#### PADDLING POOL:

During the year the Paddling Pool at Wellholme Park came into use and the Department soon interested itself in the state and frequency of change of the water, the pool being of the fill and empty type using town's water.

Samples were taken during the high summer and at least weekly change of water was recommended and the use of some sterilising agent - a quaternary ammonium compound being suggested for a trial period - also advised. The frequency of water change was increased and the sterilising agent used from late August onwards. Only the two last samples results in the following table were taken after the sterilising agent came into use, and it is hoped that 1970 results will also show similar improvement.

	Probable No. per 100 ml.							
	Coliform Bacilli	Bact. Coli type 1						
June	180+ 180+	35 50						
July	180+ 180+ 180+	180+ 180+ 180+						
August September	180+ 187+ 180+ 0	180+ 14 35 0						
<u>,                                     </u>	0	0						

#### OFFENSIVE TRADES:

The following	offensive	trades	are	carried	out in	the	Borough:	
Soap Boilers	• • • • • • • • • • • • • • • • • • • •			• • •	• • •	• • •	• • •	2
Gut Scrapers	• • • • • • • • • • • • • • • • • • • •			•••	• • •			1

The soap boilers have been carrying on their business for a great number of years, and once again have given no grounds for complaints during the year.

The gut scraper occupies one room at the local slaughterhouse.

#### MOVEABLE DWELLINGS:

There are, in the Borough, two sites used for moveable dwellings of Showmen who are members of the Showmen's Guild. In each case licences were also in force in respect of other moveable dwellings stationed on the same sites, and used for permanent occupation under the Caravan Sites and Control of Development Act, 1960.

The sites licensed at the year end were:

Site	Maximum Number of caravans	Remarks
Marshall's Site, Atlas Mill Road.	12	Subject to conditions. Site used by Showmen's Guild.
Brighouse Cricket, Cycling & Bowling Club.	1	Subject to conditions. Forms small portion of larger site used by Members of Showmen's Guild.

#### PUBLIC CONVENIENCES:

The Department is responsible for the cleaning and maintenance of all Public Conveniences, with which the town is well served.

The following is a list of such conveniences as at 31st December, 1969. These are cleansed by one man and two part-time lady cleaners. The male cleaner uses a small van for transport.

	• • •	• • • •	• • •	1 11 • 🗸 •	1 11. O. W WITHIGH

During the year the replacement of Bramston Street Conveniences was completed. The replacement was in progress at the year end of Wellholme Park Conveniences and Lane Head Ladies Convenience was improved during the year.

Once again it must be reported that vandalism was rife and considerable time was spent and expense incurred in coping with this senseless damage. Apart from George Corner conveniences our public lavatories are mostly of quite modern construction, and while now designed so that gross vandalism is not so easy, yet the modern fittings are a target for it. Our policy is one of prompt attention to damage, poetry or artistry and our conveniences have never deteriorated to the shocking state of those of many Local Authorities.

All except three of the conveniences are lit day and night with mini fluorescent fittings. Of the three not lit by day, two (George Corner and Bus Station) are lit during hours of darkness as they still have filament bulbs, while one (King George V. Playing Fields) is not lit, being merely a playing field convenience.

#### PUBLIC CLEANSING SERVICE

The Health and Cleansing Committee is responsible for the cleansing of dustbins, cesspools and pail closets and for the collection and subsequent disposal of salvage, and the removal and disposal of abandoned vehicles; also for the maintenance and control of the Departmental transport.

## (i) STORAGE OF REFUSE:

The following are the types of receptacles in use at the 31st March, 1970:

Dustbins .	••	• • •	* • •	• • •	• • •	• • •	16,706
Pail Closet	s (including	22	chemical	closets	)		95

In addition to the pails used at the permanent buildings a number are in temporary use at building sites, and the emptying of these by the Department reduces the dangers of other less sanitary methods being used.

## (ii) REFUSE COLLECTION:

The following table gives the number of types of receptacles cleansed and the tonnage collected with previous years' figures:-

			1969/70	1968/69	1967/68	1966/67
Dustbins		• • •	710,238	723,251	690,211	654,274
Pail Closets	• • •	• • •	4,832	5,188	/.5,961	6,396
Weight in Tons		• • •	9,673	9,658	9,290	10,224

The Borough is divided into five areas for refuse collection and on the four main rounds each truck carries a normal complement of a driver and three loaders. The fifth round is served by a driver and two men.

For several years the Council have operated a successful bin bonus scheme and the drivers and loaders of the above trucks participate therein.

Another small truck, with a driver and one loader only, is engaged on the pail collection and emptying of refuse bins remote from the normal round collections.

The frequency of collection was generally 7-8 days, a seven day collection being achieved for much of the year.

The normal dustbin collection service from trade premises is supplemented by a waste paper service, together with a limited number of additional refuse collections from certain food premises, on payment.

798 special visits were also made for the collection of such articles as surplus furniture. A rate-borne collection service has been offered for small amounts of surplus bulky items of household furniture for some years now and a charge (at 25/- per hour) is made where whole houses have to be cleared for agents etc., if this is for the purpose of selling or reletting the house. The system of only removing this type of refuse after full details have been given on a form simplifies the procedure and makes arrangements for collection easier. This scheme works extremely well and the town has not been unduly troubled by dumping of household furniture over the more rural parts and any spare ground.

Consideration was again given to the use of Municipal dustbin provision but the Committee decided against adopting this in 1970/71. The Council decided to use the plastic sack system of refuse collection in the new Whinney Hill Development of over 300 houses using them as bin liners. This scheme should commence in the latter part of 1970.

The following table gives particulars of collection by the various vehicles:-

	_			Capacity

# (iii) REFUSE DISPOSAL:

Two methods of refuse disposal were in operation in the Borough during the year, namely, mechanical separation with controlled tipping, and controlled tipping alone.

	The amounts dispos	ed of and	l the me	ethod o:	f dispo	sal are			- Q.
1.	ATLAS MILL ROAD WORK House refuse passe		n plant	•••	•••	• • •	6,947		2
2.	BAILIFF BRIDGE TIP House refuse	•••	••	• • •	•••	• • •	2,314	8	3
3•	MARSH LANE TIP House refuse	•••	••	• • •	•••	• • •	475	16	3
4.	TRADE REFUSE Amount tipped	•••	••	•••	•••	•••	238	13	0
							9 <b>,97</b> 5	19	0

Seventy-one per cent of house refuse, mainly from Brighouse and Rastrick, was dealt with at the Refuse Disposal Works.

Five per cent of the house refuse - from Southowram area - was tipped at Marsh Lane Tip, Southowram and the remaining twenty-four per cent - from Hipperholme and Bailiff Bridge areas - was tipped at Bailiff Bridge.

Controlled tipping was practised and screened dust from the Disposal plant was used for cover, though it is, of course, reducing each year in quantity as piped fuels supersede solid fuels.

Though over 45 years old the Refuse Disposal Plant still continued to function satisfactorily but deals with considerably more and much bulkier refuse than it was originally designed for.

After the refuse taken to Atlas Mill Road has passed through the separation plant the tailings are taken to Bailiff Bridge Tip, some two miles away, for final disposal by controlled tipping. The Atlas Mill Road Plant, therefore, operates as a transfer loading point, with separation.

Even before the Civic Amenities Act, 1967 became law the Council had decided to provide facilities for rate payers to bring garden and similar refuse to the Refuse Disposal Works each Saturday morning. An increasing use was made of this facility.

In late 1969 the Council considered a comprehensive report from the Public Cleansing and Salvage Officer on Garden Refuse, and decided to adopt a scheme of collection employing plastic sacks. These are sold at 1/- each at the office, this price including collection when full. The scheme had only just come into operation by the time winter came and while obviously a most useful additional service, no report can yet be given on its success or otherwise.

A certain minor amount of leaching out still occurs at Bailiff Bridge Tip via a storm overflow pipe. This is still being closely watched and samples of the effluent taken monthly.

Both Bailiff Bridge and Southowram tips have now very limited lives - about  $1\frac{1}{2}$  years, but the Council have a further good tip at Ashday Lane, Southowram which, with a capacity of 100,000 cubic yards, will provide tipping for three to four years. It is unfortunately rather remote from the Refuse Disposal Works and the main areas of population, and its use will involve additional costs for transport of refuse and cover material.

Planning permission was received in 1968 for the use of the long term site briefly referred to in the previous two reports which would be a costly tipping site but which has a capacity of 35 years tipping space. However, no further steps to acquire the site were taken in 1969/70.

The difficulties of disposing of refuse by controlled tipping increase each year as refuse becomes ever bulkier, and a number of Local Authorities in our vicinity have disposal problems. With the publication of the Maud Report it appears that co-operation in a Huddersfield incineration project would not be practicable, and a visit was made to the Ministry of Housing and Local Government to ascertain their reactions to a small incineration unit for Brighouse. The Ministry's advice, as expected, was that we should first consult the Authorities in our "Maud" area, and initial steps to do this had been taken at the year end.

## (iv) SALVAGE:

# (a) Waste Paper:

Waste Paper is still collected by separate collection from business premises, and by the refuse collectors at the same time as normal house refuse. It is graded and baled with a Powell baler as described in previous reports, and clean paper is disposed of to Messrs. Thames Board Mills, as has been done for many years. Soiled paper from the picking belt is disposed of to other outlets, normally at a rather lower price. It was again possible to dispose of all our production of waste paper and, in fact, this was one of those years when pressure was being exerted on us to produce more.

The following are details of the various grades of paper baled and disposed of during the year:-

Grade	T.	1969/70  Tonnage Revenue  T C Q £ s d			Percentage of grades sold		
Newspapers Fibreboard Mixed Paper Low Grade	153 228 259 155	7 9 14 6	0 0	1,724 2,649 2,472 1,451	12 5 9	6 6 0 7	20% 28% 3 <i>2</i> % 20%
TOTAL	796	16	2	8,297	8	7	100%

# (b) Baled Destructor Scrap:

292 tons 3 cwts. were sold during the year compared with 279 tons 4 cwts. the previous year. The electro-magnetic separator at the works continued to work well. The revenue was £1,580 = 7s = 9d.

#### (c) Ferrous Metals:

The amount of light and heavy scrap sold was 17 tons 7 cwts. during the year under review, which was some 3 tons 8 cwts. less than last year.

#### (d) Non-ferrous Metals:

2 tons 6 cwts. were sold and this small tonnage of some eleven different types or grades of metals, other than iron, produced a useful revenue of £332.

#### (e) Textiles:

There is still a limited market for woollens, mixed rags, carpeting, sacking, string and old beddings as our products are mostly in a dirty state. 38 tons 2 cwts. were recovered and sold, but the value was not encouraging, being £269.

A vertical electric baler is used for the baling of all textiles.

## (f) Summary:

The following table summarises the tonnages of the main items of salvage disposed of annually since the end of the war:-

	[		MONTA DE	77. A 2727777.5

<sup>\*</sup> Communal Kitchen Waste bins withdrawn from streets.

### (v) TRANSPORT:

The Department operates a fleet of ten motor lorries, four vans and one loading shovel and employs a mechanic, all repairs and maintenance being carried out in the Department's own garage.

The table on the following page gives details of the fleet at the year end.

No.23 was taken out of service 31st March, 1970 and No.28 then became a spare vehicle, being replaced from 1st April, 1970 by No.44.

<sup>+</sup> Hand picking of Metals and Textiles at tip stopped.

<sup>\$</sup> Kitchen Waste collection ceased - July.

# (vi) ABANDONED VEHICLES:

Since the Department was given the task of dealing with abandoned vehicles in 1966 an increasing amount of technical and administrative time has had to be given to this growing task. The following table gives details of apparently abandoned vehicles dealt with during the year ended 31st March, 1970 and four previous years. There has not been any real difficulty in dealing with this problem.

	VEHICLES									
		7 DAY PROCEDURE				21 DAY PROCEDURE				
Year April to March	Number found Abandoned	No tices Served	Removed by Owner	Removed by Council for Disposal	Notices Served	Removed from Site by Owner	Removed to	Removed from Compound by Owner	Disposed of by Council	Out- standing at year-end

1969/70	48	3 .	1	2	20	14	3	0	4	8

# (vii) LETHAL CHAMBER:

The Department continued to operate the Lethal Chambers for the disposal of unwanted pets, the charge being 2/6d for each animal dealt with. Cats are chloroformed and dogs electrocuted.

#### (viii) GENERAL:

It is appropriate that once again reference should be made to the excellent service given to us by the regular staff and workmen in the Department. It is because of the diligent yet pleasing character of these men, and their ability to work with the minimum supervision, that our relations with the public have remained good and complaints, which are inevitable, kept to a minimum. Unfortunately, as older men have retired, in recent years, it has usually been difficult to replace them with men of the same calibre.

Brief reference has been made under refuse collection to the fact that the employees engaged on the five collection rounds participate in a bin bonus scheme. This scheme has operated without any basic change, other than increases from time to time in the price per bin emptied above the target, for nearly 20 years.

79.

For some years now, other workmen have participated in a "lieu" bonus scheme based on a percentage (60%) of the average bin bonus, worked out on an hourly rate. This "lieu" bonus is also paid to binmen when not engaged on refuse collection.

The two men who collect garden refuse enjoy an additional bonus which in 1969/70 was very small as the scheme was only just getting under way.

During the year the Council considered a report from Consultants on Work Study in respect of all Council Departments employing labour. So far as the Cleansing Department is concerned the report was encouraging.

#### (ix) DEPARTMENTAL REVENUE:

The following is a list of the Department's revenue obtained during the year:-
